For construction information please see page 1

Inside the Sherwood 12

Sherwood 25 with wheels

Sherwood 25 showing pull out droppings board

Sherwood 35 with optional wheels, 12' run and stable door

We make the Sherwood range in 7 different sizes. This page covers the 3 smaller sizes, please see page 15 for the larger sizes to accommodate up to 100 chickens.

The Sherwood's have removable perches running along the back of the house, underneath is a sliding droppings board which can be accessed from both sides for easy cleaning. The nest boxes are underneath the droppings board, and have hinged doors on the outside for external egg collection.

On the front of the house there is a weldmesh covered window for ventilation and light, an adjustable wooden shutter covers this window. There is also the access door plus the pop hole for the chickens.

As standard the Sherwood has wooden skids to lift it off the ground slightly. Optional wheels are available as well as an optional 12' run if required.

Please note we now make our nest boxes with a black stock board (plastic) roof instead of wood and felt.
