

The Chase

Chase Size

8'4" x 4' x 5' high (2.54 x 1.22 x 1.52m high)

The back of the house is 4' high (1.22m)

3 Nest Boxes

Suitable for up to 10 standard sized chickens or 14 bantams.

Optional Extras

- A pop hole in the wire end to let the chickens out of the run without having to open the large wire door
- A 3' extension on the run to give the chickens a bit more space if you can't let them out
- A wooden back panel rather than wire to give more shelter

Inside the Chase

Chase

Chase

The Chase has a raised house area which is roofed in corrugated onduline and an integral run which is roofed in corrugated perspex. This keeps the run area dry whilst allowing plenty of light in.

Carrying handles run throughout the building so you can move it around and they also double up as day time perches. These are especially useful when it is raining and the hens still want to be outside. If there is not enough space for the handles, they do slide out.

The Chase has 3 nests boxes, which can be accessed from the side of the house. Above

the door to the housing area there is a weldmesh covered opening for ventilation. Inside the house there are 4 removable perches. The Chase is really easy to clean out with a pull out floor.

Please note The Chase was redesigned in October 2016. We can still make the old version of the Chase if you are familiar with it and would prefer that style. Please contact the office **01630 673747**.
