

The Thicket

Thicket Sizes

8' x 5'4" x 5' high
(2.4 x 1.6 x 1.5m high)

4 nest boxes

Suitable for 12 hens or 16 bantams

Removable carrying handles approx. 11' long

Optional Extras

- A pop hole in the wire end to let the chickens out of the run without having to open the large wire door
- A 3' extension on the run to give the chickens a bit more space if you can't let them out
- Wheels on the house at one end to act like a wheel barrow
- Optional green roof

Standard Thicket

Showing pop hole and ventilation

Standard Thicket

Thicket with a 3' extended run

Thicket with green roof, extension and wheels

The Thicket is our best selling poultry house due to its design and style. The Thicket is suitable for up to 12 standard birds or 16 bantams. It is just like the smaller 'Mini Thicket' with the boards around the base, the onduline covered run and the removable carrying handles, but deeper and taller. The larger Thicket has 4 nest boxes and a block of removable perches inside.

Over the years we have made many alterations to the Thicket design to accommodate client's requirements, such as increasing the height, the length and often altering it to accommodate turkeys, quail, rabbits, ducks and guinea fowl. Please do not hesitate to contact us if you have any special requests.

For construction information please see page 1

Please note we now make our nest boxes with a black stock board (plastic) roof instead of wood and felt.
