4' x 2'6" x 3'4" high (1.2m x 0.76m x 1m high)

Suitable for up to 8 birds depending on breed

### Optional extras

- 8' long run
- 2 nest boxes and perches

The Copse with optional nest boxes

The Copse with 8' run

The Standard Copse

Copses at an Agricultural College

Our multi-purpose Copse is great for ducks, chickens and other small animals. It has a hinged lid for internal access as well as the main door on the front. There is a weldmesh covered window for light and ventilation, with sliding shutter.

The Copse has a solid wooden floor and is made with wooden skids as standard to lift it off the ground slightly. There is a pop hole on the right hand side to release the birds and an optional 8' run.

Please note we now make our nest boxes with a black stock board (plastic) roof instead of wood and felt.
