

The Mini Thicket Aviary style poultry house

Mini Thicket Size

8' x 4' x 4'5" high (2.4 x 1.2 x 1.35m high)

3 nest boxes

Suitable for up to 8 hens or 12 bantams

Removable carrying handles approx. 11' long

Optional extras

- A pop hole in the wire end to let the chickens out of the run without having to open the large wire door
- A 3' extension on the run to give the chickens a bit more space if you can't let them out to free range
- Wheels on the house at one end to enable the Thicket to be moved like a wheel barrow
- Optional green roof instead of black

Mini Thicket with optional wheels

Mini Thicket with doors open

Mini Thicket

Mini Thicket with 3' extended run

The smaller size of our best-selling 'Thicket' poultry house (opposite). The Mini Thicket is suitable for up to 8 standard birds or 12 bantams. It has two boards around the base to give protection from the winds and also deters foxes and other predators from digging. Removable carrying handles run throughout the building and double up as daytime perches. The whole building is roofed with black corrugated onduline.

There are 3 nest boxes with the Mini Thicket and a block of removable perches inside to make it really easy to clean out. There is a vertical sliding pop hole with ladder to give the chickens access between the house and run and a sliding window gives plenty of ventilation to the house. Air can also flow under the corrugations of the roof.
