Optional extras

- Wheels on the 50 bird house only
- Metal towing skids
- Pop hole on side instead of the front
- Sliding glass windows on the sides

Sherwood 50 on wheels

Sherwood 50 droppings board and perches

Sherwood 50 on metal skids

Sherwood 60 with optional sliding window

Sherwood 100 with extra pop hole on the side

We make the Sherwood range in 7 different sizes. This page cover the 4 larger sizes, please see page 10 for the smaller sizes to accommodate up to 35 chickens. Please note the 50 bird house is 5' high, whereas the larger ones are 6' high.

The Sherwood's have removable perches running along the back of the house, underneath is a sliding droppings board which can be accessed from both sides for easy cleaning. The nest boxes are underneath the droppings board and have hinged doors on the outside for external egg collection.

On the front of the house there is a weldmesh covered window for ventilation and light, an adjustable wooden shutter covers this window. There is also the access door plus the pop hole for the chickens.

As standard the Sherwood has wooden skids to lift it off the ground slightly. Metal towing skids are an optional extra on the Sherwood so that you can move the building around the field.
